

Jamalam / James

I have been modding for 5 years and currently have over 70,000,000 downloads on Curseforge. I have worked with several high-profile YouTube clients, as well as private clients and server owners. Below is a selection of examples of my past work - although you can find a more comprehensive and actively updated list of my personal projects on my GitHub or Curseforge.

COMMISSIONED MINECRAFT MODS

‘Minecraft But You Can Grow Mobs’ — Jagster

A mod that allows the player to grow mobs out of seeds. [YouTube](#)

‘Minecraft But There Are Storms’ — SocksFor1

A mod that adds a random storm every 60 seconds, such as acid rain or random loot.

Alt Checker — Private Client (Server Owner)

A Fabric server-side mod that records IP addresses to prevent a single player joining with multiple accounts.

PERSONAL MINECRAFT MODS

RightClickHarvest — 36M+ Downloads

JamLib — 33M+ Downloads

Utility Belt — 800K+ Downloads

OTHER PERSONAL PROJECTS

Pigeon Mail

‘Chat with a daily pen pal, completely anonymously.’ My entry to the Supabase Hackathon.

Doogle

A stress-relieving website which shows users images of dogs! They can swipe left or right to upvote or downvote the pictures.

Pest IDE Support

I created the IDE tooling for the [Pest parser generator](#), including various editor extensions and the language server.

SKILLS

Fabric, Forge, and Neoforge modding

Multiloader modding using Architecture

Working with clients to flesh out ideas

Working to tight deadlines

Web development with a variety of frameworks

LANGUAGES

Java, Rust,
TypeScript/JavaScript (along with HTML and CSS/Tailwind),
C#
